Amazing camera.  
Authentic sound.

As recommended  
by

You?

## Camera

### Continuous Shooting

Now you never have to miss the moment. Just press and hold the shutter button and the camera captures every picture until you let go. Then choose the best photo or save all of them.

### HTC Video Pic™

Record HD video and snap photos at the same time, or take stills during video playback. So you never have to choose between capturing video or a picture again.

### HDR

Get the most natural-looking shots in high-contrast lighting situations with HDR. Press the shutter button and a series of three photos will be taken rapidly, then merged to give you the best looking shot.

## Sound

### Beats Audio™

Hear music the way the artist intended. It's all there, the highest highs the lowest lows and everything in between. And whether you're listening to music, playing a game or watching video you get the same truly authentic sound.

### Music

An integrated music experience for easy access to all your music libraries, favorite audio apps and internet radio from one convenient location.
